Happy  
Pongal

Pongal is the most popular harvest festival of South India, mainly in Tamil Nadu. Pongal falls on the 1st day of the tamil month “தை” every year and marks the beginning of Uttarayan – the sun’s journey northwards. Pongal festival lasts for four days. This four days long festival of Tamil Nadu is celebrated for showing gratitude to nature. The literal meaning of Pongal is "spilling over" and it had been named so, because of the tradition of boiling rice in a pot until it starts overflowing. Other traditions of the celebration include Rangoli, Breaking the pot & cooking of delicious Pongal.

MPS celebrated the Pongal celebration in a splendid manner. The Pongal celebrations started with a traditional Pongal song. The students from different Grades performed traditional dance and did a magnificent job. Ishan Nadhi from Grade II also performed live cooking. He prepared a Tamil dish "Paniyaram", which was exquisite. The various celebrations and events at the school were designed in a manner to evoke & expose the students' innermost talents. Pongal was prepared by our teachers in a traditional way using earthen pots and served to all the students present on that day. The Pongal festival celebration in our school is a true manifestation of our rich culture and traditions. It can be seen at its vibrant best. With the ongoing Pandemic in mind, only the participants had come to school and for all the other students the function was telecasted live.

Keeping in mind the safety of our students, our state Health department conducted a vaccination camp in our school campus on 04-01-2021 for students from IX, X, XI and XII. Gardening is the practice of growing and cultivating plants as part of horticulture. In gardens, ornamental plants are often grown for their flowers, foliage, or overall appearance; useful plants, such as root vegetables, leaf vegetables, fruits, and herbs, are grown for consumption, for use as dyes, or for medicinal or cosmetic use. Terrace gardening is popular in metropolitan cities, due to space constraints. Terrace gardens can help people to enjoy the greenery and nurture vegetables, flowers and fruits. A terrace garden can be developed on the roof of any industrial, commercial or residential building. Our student Ishan Natty from Grade II loves gardening and has a Terrace Garden at his residence. They have many beautiful and mesmerizing flowers and vegetables like Raddish, beans, tomatoes etc.. Ishan has a Youtube page in which he has uploaded a video of Terrace Garden tour. We really appreciate and congratulate Ishan and his family for such an innovative activity.
